Summary

I develop single page applications and user interfaces for various devices using Angular, ReactJs , HTML5, CSS3, Bootstrap and Typescript. I also work with RESTful web services and APIs, and integrate them with front-end frameworks.

My goal to leverage my skills and knowledge to create innovative and impactful solutions that can benefit various industries and sectors.

Experience

Excellimatrix Private Limited — New Delhi (Remote)

Aviator NovaFlight.com — 01/2024 - 09/2024

- Implemented new features and enhanced the user experience across the application, ensuring intuitive and user-friendly interfaces.
- Developed reusable and dynamic components, focusing on scalability and maintainability to support long-term development needs.
